

Hundreds of Colorado REALTORS® Are Using This Benefit to Save Thousands Each Year on Healthcare

The Colorado Association of REALTORS® has been making a dedicated effort to help lower the cost of healthcare for its members. These efforts have produced options for CAR members that are both high-quality and cost-effective. Check it out!

Since June 2019, CAR has made a refreshing alternative for managing healthcare costs available by utilizing the Sedera Medical Cost Sharing Community. Through Sedera's Medical Cost Sharing model, members save between 30 – 60 percent on health care costs. Many REALTORS® have already found this option to be a great way to address their healthcare expenses, and several have provided testimonials to help other members understand the solution and their experiences with it. You can read those [testimonials here](#).

In April 2020, a new approach was launched that paired the Sedera membership with Redirect Health to provide a high-quality solution for managing small and large medical costs. Enrollment includes the following:

1. Redirect Health, which provides unlimited 24/7/365 access for smaller and preventive needs via virtual primary care and care coordination for larger medical needs.

2. Careington Vision and Dental, a vision and dental discount plan included for enrollees for no extra cost.

3. NewAm Health Prescription Discount Plan, an effective prescription discount program.

4. Sedera, a national Medical Cost Sharing Community which addresses the large medical costs caused by accidents, illnesses, surgeries, etc. It is important to note that Sedera does have limitations on sharing for procedures to treat pre-existing conditions. Please make sure you understand these limits prior to enrolling.

We strongly encourage anyone interested in this option to start by watching this [short video](#) that outlines the program.

For more information, please contact Alpine Association Benefits or visit them [online](#). We are thrilled that so many of our REALTORS® (and industry partners) are taking advantage of this option. We hope many more will find it to be an effective solution for managing healthcare expenses for themselves and their families.
