

DMAR Logo Use

Please observe these guidelines when using the DMAR logo

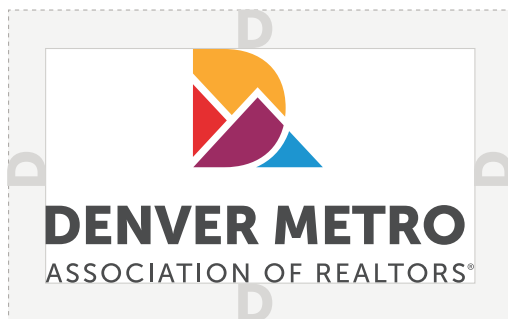

Never alter any elements of the DMAR logo. Use the full-color, primary logo whenever possible. Do not place the full-color logo on color backgrounds. Observe the clear space around the logo and give it the proper "breathing room" when placed side-by-side with other logos or graphics. The alternative lockup should be used in situations where limited space requires a more horizontal orientation. The black and reverse logos should be used when printing restrictions limit the color or background used.
